Experience

Fluid Media Technologies, Hamilton - *Senior Software Developer*

Sept 2017 - Present

Team leader and senior developer on many aspects of the Fluid Media System. With a focus on APIs, architecture and Vue components, we're working towards building a scalable product that will last for years to come.

Parallel Digital Studio, Hamilton - *Senior UX Developer*

Formerly **factor[e] design initiative**

May 2009 - August 2017

Work closely with clients, designers and developers to build the best possible solution to meet the needs of the application. Every project is custom and designed to achieve the goals of the client.

Social Media Group, Hamilton - *Social Media Analyst*

May 2008 - May 2009

In house web project development, programming and design.

Education

George Brown College - *Design Management*

September 2007 - April 2008

University of Guelph - *Bachelor of Arts with Honours - Fine Art*

September 2000 - April 2005

Interests

I am an organizer for the HamOnt Conference series in Hamilton and topic leader for HamOnt UX. I've mentored for Ladies Learning Code in Hamilton and I have volunteered for local political issues like public transit and various elections.

Currently most of my spare time is been spent with my family. I also enjoy painting (society6.com/eimaj), design (eimaj.net/pixel.html), strumming guitars, gardening and sailing when I can find the time.
